EEO DETAILED OCCUPATION REPORT
1980 CENSUS OF POPULATION

Source: Census of Population, 1980: Equal Employment Opportunity Special File [machine-readable data file]/prepared by the Bureau of the Census--Washington: The Bureau [producer and distributor], 1982.

Prepared by: The Ohio Data Users Center, Ohio Department of Development

This report is based on the Equal Employment Opportunity Special File produced by the U.S. Bureau of the Census. The Ohio Data Users Center (ODUC) has issued this report as an aid to data users not having access to computer or microfiche equipment.

The Equal Employment Opportunity Special File contains sample data inflated to represent the total population. This sample is based on one-out-of-every-six housing units or households for most areas of the country. Areas estimated to contain 2,500 or fewer persons have a three-out-of-every-six sampling rate. Geographic units available from the EEO File include state, SMSA, county, and places with 50,000 or more in population. Additionally, other tabulations are available from this file.

Questions regarding these data should be directed to:

The Ohio Data Users Center
Ohio Department of Development
P.O. Box 1001
Columbus, Ohio 43216
(614) 466-2115

SUPPRESSION

To maintain the confidentiality promised respondents and required by law, the Census Bureau takes precautions to insure that its public data, in print or on tape, do not disclose information about particular individuals; therefore, the Bureau suppresses tabulations or characteristics for very small geoups of people.

Characteristics of persons are shown for a specific race/Hispanic category if there are at least 30 or more persons in that category living in the geographic area. Data which have been suppressed for a particular category are displayed as zeros. However, a category containing zeros does not automatically indicate suppression since an actual value of zero will also be displayed. Distinguishing between suppressed categories and those which contain true zeros can be determined by referring to the heading of each category. Headings which have an asterisk (*) beside them indicate categories for which the data have been suppressed.

In some cases complimentary suppression is applied to categories containing more than thirty persons to prevent derivation of suppressed data by simple computation.

DEFINITIONS

Civilian labor force. Employed and unemployed civilians.

Employed. Civilians 16 years old and over who were either (a) "at work"--those who did any work at all as paid employees or in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers on a family farm or in a family business; or (b) "with a job but not at work"--those who did not work during the reference week but had jobs or businesses from which they were temporarily absent due to illness, bad weather, industrial dispute, vacation, or other personal reasons. Excluded from the employed are persons whose only activity consisted of work around the house or volunteer work for religious, charitable, and similar organizations.

Unemployed. Civilians 16 years old and over who were neither "at work" nor "with a job, but not at work" and who were:

a) looking for work during the last 4 weeks, and b) available to accept a job.

Examples of jobseeking activities are: (1) registering at a public or private employment office, (2) meeting with prospective employers, (3) checking with friends or relatives, (4) placing or answering advertisements, (5) writing letters of application, and (6) being on a union or professional register.

Also included as unemployed are persons who did not work at all during the reference week and were waiting to be called back to a job from which they had been laid off.

The concept of experienced unemployed is discussed below under Experienced Civilian Labor Force.

Unemployed, no civilian work experience since 1975. Persons are classified as unemployed with no civilian work experience since 1975 if they reported themselves as unemployed in 1980 and one of the following: (1) their last job since 1975 was in the Armed Forces; or (2) they last worked in 1974 or earlier; or (3) they reported that they had never worked.

In addition to the above classification, the concept of Experienced Civilian Labor Force appears in certain detailed tabulations.

Experienced Civilian Labor Force. The EEO file includes employed persons and those unemployed persons who have worked at any time in the past, i.e., "experience unemployed." (Occupation and industry data were not collected for persons who have never worked, or who have not worked since 1974.) Excluding those persons in the category "unemployed, no civilian work experience since 1975," the EEO file essentially defines the experienced civilian labor force.

OCCUPATION. The kind of work the person was doing at a job or business during the reference week or, if not at work, at the most recent job or business if employed since 1975. Persons working at more than one job were instructed to describe the one at which the person worked the most hours during the reference week. Occupation is most frequently tabulated for employed persons 16 years old and over, and less often for the experienced civilian labor force, which included both employed and experienced unemployed 16 years old and over. Occupation data were also collected but are not tabulated for persons not currently in the labor force who have worked since 1975. Occupation is not determined for persons in the Armed Forces. These data were collected on a sample basis.

The write-in responses to questions 29a and 29b were taken together to assign the respondent to one of 503 occupation categories, coded by specially trained industry and occupation coders in census processing offices. Only the code, i.e., none of the written-in information, is retained on census basic records and public-use microdata. Census occupation categories are fully defined in the Classified Index of Industries and Occupations, PHC80-R3. (Persons wishing to use the census system in coding other data bases may use the Alphabetical Index of Industries and Occupations, PHC80-R4.)

Relation to Standard Occupational Classification. The 503 occupation categories generally are based on the Standard Occupational Classification (SOC) system, originally issued in 1977 by the Office of Federal Statistical Policy and Standards and revised in 1980. One of the major purposes of the SOC is to promote uniformity and comparability in the presentation of occupational data collected by various agencies. Public-use microdata documentation and other references will define the relationship between the 3-digit census codes and the revised 4-digit SOC codes.
